

Autonomous Maintenance saves time and increases productivity.

Global CPG Manufacturer sees over 1300% increase in machine inspections.

Situation

Like many organizations, our customer used an ERP (Enterprise Resource Planning) product to manage their preventive maintenance program. As a result, preventive and predictive programs did not capture the quantity and quality of machine inspections data required to fulfill the program's objectives.

Implementation

Weever Inspections solved this problem by alerting staff when inspections were required and by providing them with a simple interface used to efficiently collect data.

This increased productivity allowed maintenance teams to offload simple machine-related maintenance activities, such as CIL (Clean, Inspect and Lubricate), to machine operators.

Weever provided comprehensive training to the application administrators and also provided an on-boarding video for staff and supervisor users.

Simple data capture tools, including photo capture with sketch and conditional logic, made it easy for staff to complete inspections quickly. Failed inspections automatically created a work order for maintenance review.

Results

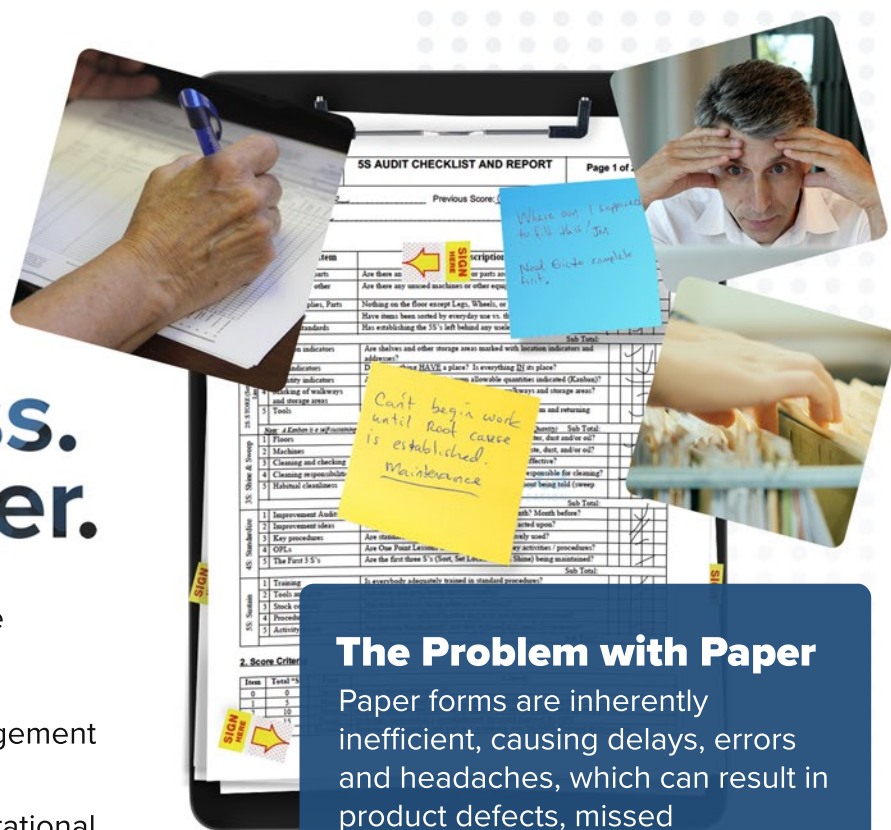

Over the course of 1 year, our customer executed over 13,000 inspections and scheduled preventive maintenance activities, including 5,000 CILs (clean, inspect and lubricate) activities executed by operators. Before the implementation of Weever Inspections, this facility collected only 1000 machine inspections per year.

- ✔ Executed over 13,000 inspections in one year.
- ✔ Savings of 500+ hours for maintenance team.
- ✔ Executing over 35 PMs per day.
- ✔ Over 1300% increase of machine inspections.

“Weever has changed how I run our business.”

INGRID K
PLANT MANAGER

Go Paperless. Work Smarter.

Weever is a powerful and easy-to-use workflow management platform that dramatically improves operational efficiency, enhances employee engagement and ensures compliance at all levels.

Weever makes it easy to digitize operational workflows so you can experience the benefits of digitization today.

The Problem with Paper

Paper forms are inherently inefficient, causing delays, errors and headaches, which can result in product defects, missed inspections, safety liabilities, compliance issues and lost revenue.

DIGITAL DATA CAPTURE

Empower. Engage. Energize.

Weever is intelligent software that does not simply capture data, it guides staff through the job, which decreases training, guarantees compliance, increased productivity and ensures the job gets done right the first time ... and every time.

WORKFLOW AUTOMATION

Collaborate. Get things done. Move forward together.

Weever ensures your projects move forward quickly and real results are achieved. Weever helps you stay on track by enhancing visibility, accountability and employee engagement.

REAL-TIME REPORTING

Instant insights from the floor to your reports.

Manage your data your way. Capture safety, quality, production and maintenance data instantly in data tables as well as customizable dashboards featuring graphs and charts. Share your data with other business systems in real-time.

Weever automates critical processes so you can focus on delivering value.

Weever is used to capture data, manage workflows and automate reporting, but what it delivers is much more than that. Weever offers peace of mind to department managers who want to understand what is happening, who's on it and when it's going to be done.

Weever allows staff to “work better”, enabling their success, which enhances employee engagement and retention. Weever also increases operational efficiency and productivity, so you can do more with less and realize massive cost and time savings.

Better Visibility

Understand insights instantly. Know what is happening in real-time. No more surprises.

Enhanced Engagement and Retention

Get the most out of your staff by providing them with the tools and resources that enable successful outcomes.

Increase Efficiency, Productivity and Cost Savings

Capture rich data to inform improvements and ensure everything gets done faster and correctly.

Set the Foundation for Rapid and Organization Growth

Automate processes. Spend less time “administrating” and more time doing the real work of driving results for your organization.

“Weever’s got all my forms and information that make my job easier.”

ANNA KACZMARCZYK
OPERATOR

We only “win” if you “win”.

Weever is one of the fastest growing Workflow Management Software Platforms in the world because our priority is the success of our customers.

We have created the easiest to use platform so staff can learn it quickly without exhaustive on-boarding. Our platform is also highly flexible so it can be adapted to suit the unique and complex needs of our customers.

One Site License

Unlimited forms, users, assets. Our simple pricing structure takes the guess work out of seats and access permissions.

Ease of use

A system that people won't use is a system that won't work. The simplicity of our user-interface guides staff, which reduces training and makes success more attainable.

Flexibility

Weever feels like a custom solution because of its flexibility. Weever is easy to configure, which makes it useful across a variety of industries, departments and use cases.

Our Priority is your Success

We only succeed if you succeed. We build partnerships with our customers by understanding your challenges so we can help you overcome them.

Operational Excellence Focus

Digitization unlocks your ability to pursue operational excellence.

“Weever is very fast and very efficient. Everything just works and flows. It’s really nice to work with. I love it!”

CARMEN H. - TRAINING COORDINATOR

“Weever has changed how I run our business.”

INGRID K. - PLANT DIRECTOR

“It’s amazing because things are being fixed before anybody knows there’s a problem.”

TIM K. - COMPTROLLER

Digitize all operational processes with Weever.

Unlike other more specialized platforms, Weever is universally useful across all departments. Set up forms for safety, quality, maintenance, compliance, training, production and so on.

Staff love that they only need to use one tool to get it all done. And you can simply share the data with other business systems if you require more specialized features.

Who? What? Where? When? How? SOLVED!

Ensure your frontline staff are armed with the most up-to-date forms, documentation, tools and resources to be successful. Set up workflows to automatically initiate, assign and notify. Automate reporting dashboards to give all stakeholders what they need to understand where we're at, where we're going and what we need to do to get there.

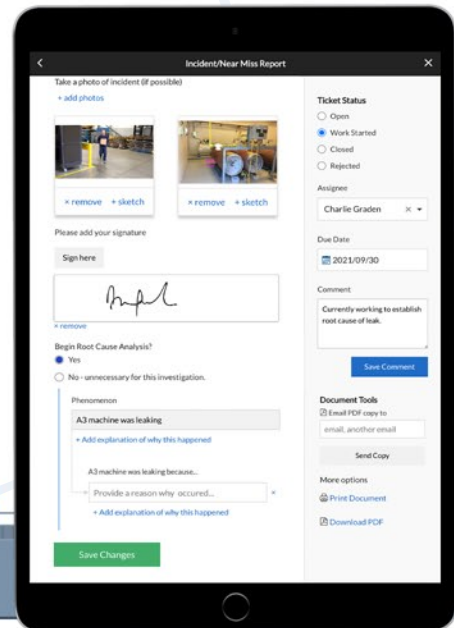

REAL-TIME REPORTING

Automate impressive dashboard reports that make insights clear. Seamlessly share reports with stakeholders and data with other business systems.

WORKFLOW AUTOMATION

Ensure compliance with internal SOPs and external regulations by automating workflow requirements include action items, documentation updates, training and approvals.

DIGITAL DATA CAPTURE

Use digital forms to capture data from frontline staff initiated by a schedule, sensors or events that occur.
